

## 10 Items you may not know are HSA-eligible

You probably know that your health savings account (HSA) contributions can be used to cover doctor visits (preventative, primary care and specialists) and prescriptions. But you may not realize your HSA dollars can also cover these commonly-used products and services.

### When you pay for these items using your HSA, it's like getting a 20-30% discount on:

1. **Dental services** – including orthodontics
2. **Vision products and services** – including corrective procedures such as LASIK
3. **Therapeutic services** – including physical therapy & chiropractic care
4. **Diagnostic procedures** – including labs, scans, imaging

5. **Mental health services** – including psychiatric care, therapy & counseling
6. **Medical supplies** – including bandages, crutches, wheelchairs
7. **Over-the-Counter Medications** – such as Tylenol, Advil, Zyrtec
8. **Fertility treatments** – such as IVF, or birth control products
9. **Baby care items** – such as breast pumps & supplies
10. **Long term care** – including nursing services

Will *you, your spouse, or your dependents* be using these services this year or in the future? If you're not using your HSA for these items, you are missing out on a fantastic opportunity to save.

In general, qualified expenses are those that would qualify for the medical and dental expenses deduction on your income tax return. See IRS Publication 502 for more information.
